Limited availability

This Ineqe Group Masterclass is limited to 14 delegates. It begins with a briefing on contemporary issues including child sexual exploitation, emerging threats and how offenders use the internet.

During the interactive workshop delegates learn to use our acclaimed Safer Social Networking Activity Packs (SSNAP). The SSNAP cards facilitate experiential learning, enabling participants to identify and respond to a range of risks associated with young people's use of technology.

LEARNING OUTCOMES

- An understanding of **safeguarding** in the context of young people's lives and their use of social media.
- An enhanced awareness of **offender behaviour**, tactics and use of new technology.
- The ability to formulate **prevention** and intervention strategies.
- The ability to use the SSNAP training resource to **cascade learning**.

SPECIAL INCLUDES A SSNAP BOX, ONE YEAR LICENCE TO THE SSNAP APP & ONLINE RESOURCES

Throughout the UK & Ireland

Safer Social Networking Activity Pack (SSNAP)

SSNAP is an educational activity and game that provides a flexible resource for teachers, youth leaders and other child protection professionals.

The activities described in the pack have been designed for both the novice and the experienced social media user.

The SSNAP cards represent different components and activities within a social media platform.

Jim Gamble QPM

Jim is the current CEO of Ineqe Group, the former and founding Chief Executive of the Child Exploitation and Online Protection (CEOP) Centre, and the founder and initial Chair of the Virtual Global Task Force. He is the current Independent Chair of the City and Hackney Safeguarding Children Board.

Jim oversaw the development and design of the Safer Social Networking Activity Pack (SSNAP).

The content of each card has been developed to reflect real case studies and provide a credible insight into the contemporary use of such platforms by children and young people.

The cards reinforce the importance of understanding privacy, applying the right safety settings and identifying when users may be vulnerable to grooming, CSE, subject to bullying or involved in high risk behaviours.

Safety cards ensure participants know where, when and to whom to go to for help.

"I had very little understanding of Facebook so didn't fully understand the implications to young people. My understanding is much improved."

eSafety Subject Leader

"Really changed my views on my personal need to be on social media sites to understand needs in school. Cards are a fantastic resource for discussion."

Primary School Teacher
